Cloud-Based Property Buying and Rental System in Chennai Using Zoho Creator (SaaS)

Aim

To create a Cloud-Based Property Buying and Rental System in Chennai using Zoho Creator as a Software as a Service (SaaS) application.

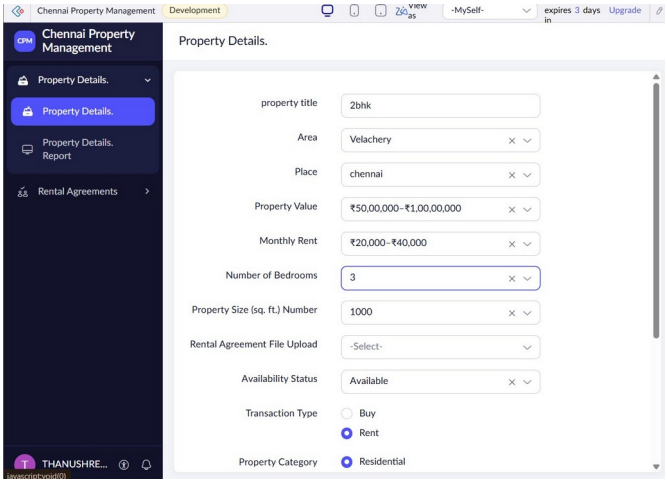

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named Chennai Property Management.
4. Create a form named Property Details to store the property information.
5. Add the required fields to the Property Details form:
    - Property Title
    - Area
    - Place
    - Property Value
    - Monthly Rent
    - Number of Bedrooms
    - Property Size (sq. ft.)
    - Rental Agreement File Upload
    - Availability Status
    - Transaction Type (Buy / Rent)
    - Property Category
6. Create a second form named Rental Agreement.
7. Add the required fields to the Rental Agreement form:
    - Tenant Name
    - Tenant Phone
    - Owner Name
    - Monthly Rent
    - Security Deposit
    - Agreement Start Date
    - Agreement End Date
    - Agreement Document
    - Agreement Status
    - Property
    - Property Details
8. Configure the field types according to the data required (Text, Phone, Currency, Date-Time, File Upload, Dropdown, Radio and Lookup fields).
9. Link the Rental Agreement form with the Property Details form using the Property and Property Details lookup fields.
10. Design and arrange the form for easy user interaction.
11. Save and publish the form.
12. Enter sample rental agreement details into the form.
13. Submit the form and verify that the entered data is stored in the cloud.
14. Test the application by entering different tenant and property details.
15. Verify that the Property Buying and Rental System works successfully as a SaaS application.

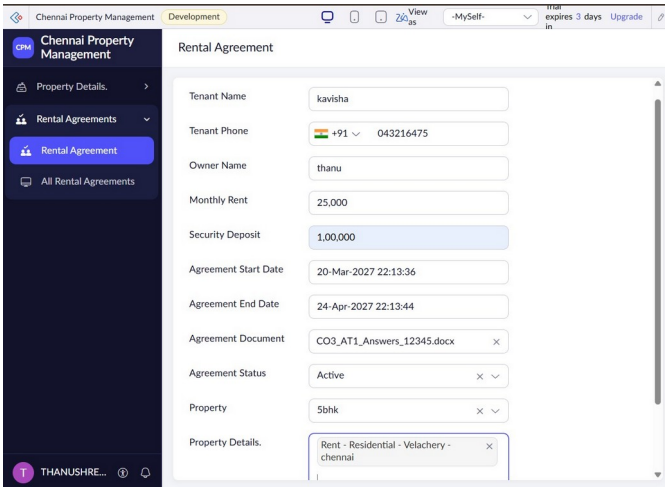

Implementation

Input:

Property Details form

Rental Agreement form

Output:

All Rental Agreements

Tenant Name	Tenant Phone	Owner Name	Monthly Rent	Security Deposit
