Experiment - 4

SIMATS Library Book Reservation System Using Zoho Creator (SaaS)

Aim

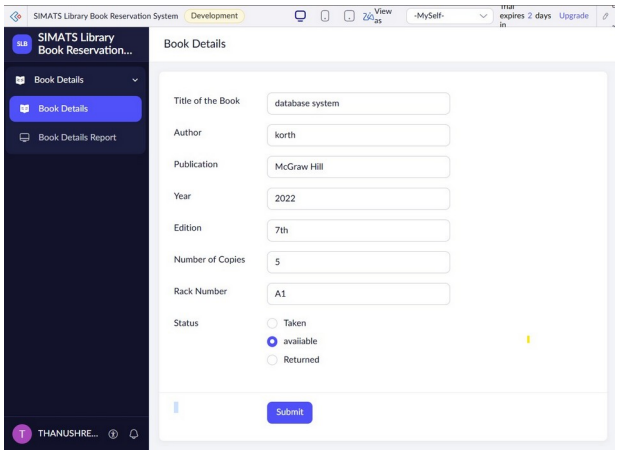

To create a SIMATS Library Book Reservation System using Zoho Creator as a cloud-based Software as a Service (SaaS) application.

Procedure

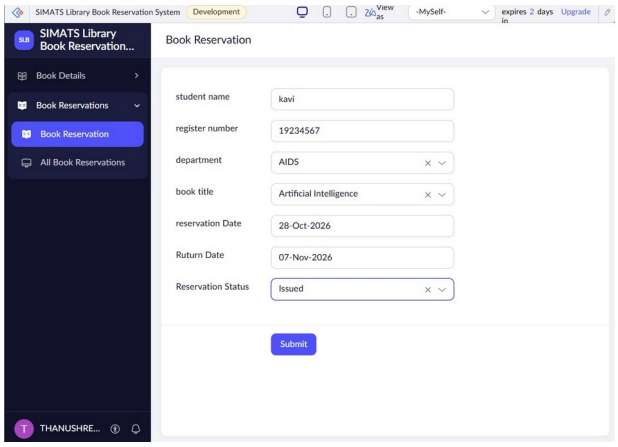

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named SIMATS Library Book Reservation System.
4. Create a new form named Book Details to store the library book information.
5. Add the required fields to the Book Details form:
    - Title of the Book
    - Author
    - Publication
    - Year
    - Edition
    - Number of Copies
    - Rack Number
    - Status (Taken / Available / Returned)
6. Create a second form named Book Reservation.
7. Add the required fields to the Book Reservation form:
    - Student Name
    - Register Number
    - Department
    - Book Title
    - Reservation Date
    - Return Date
    - Reservation Status
8. Configure the field types according to the data required (Text, Number, Radio, Dropdown and Date fields).
9. Design and arrange the forms for easy user interaction.
10. Save and publish the forms.
11. Enter sample book details and student reservation details into the forms.
12. Submit the forms and verify that the entered data is stored in the cloud.
13. Test the application by entering different books and reservations.
14. Verify that the Library Book Reservation System works successfully as a SaaS application.

Implementation

Input:

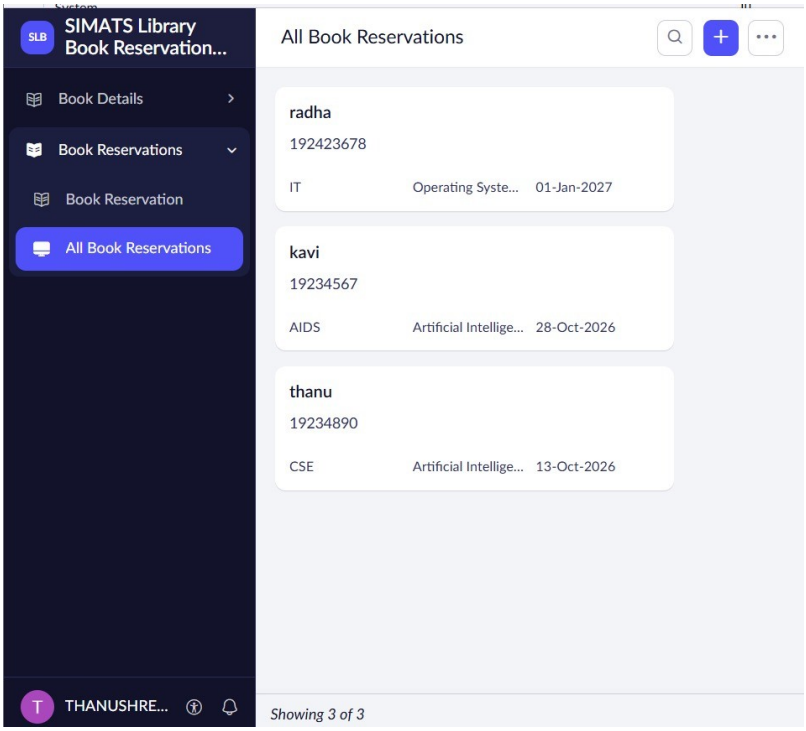

Book Details form

Book Reservation form

Output:

Result

Thus, a SIMATS Library Book Reservation System was successfully created using Zoho Creator and demonstrated as a Software as a Service (SaaS) application.
