Experiment - 6

Payroll Management System Using Zoho Creator (SaaS)

Aim

To create a cloud-based Payroll Management System using Zoho Creator to enter employee payroll details and view the generated payroll report.

Procedure

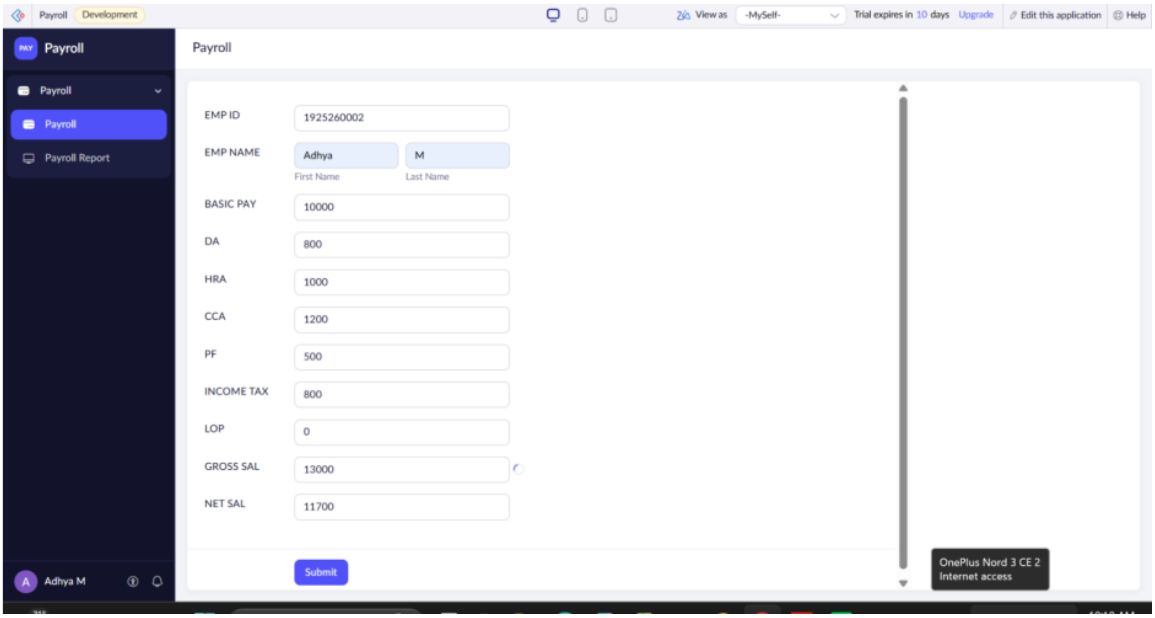

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the available applications.
3. Create or open the Payroll application.
4. Create a payroll entry form to capture employee and salary details.
5. Add the required fields, such as Employee ID, Employee Name, Basic Pay, DA, HRA, CCA, PF, Income Tax, LOP, Gross Salary and Net Salary.
6. Configure the fields with suitable data types and arrange them clearly in the form.
7. Save and publish the payroll form.
8. Enter sample employee payroll details and submit the form.
9. Open the Payroll Report to verify that the submitted payroll record is displayed.
10. Check the salary components and confirm that the record is stored in the application.

Implementation

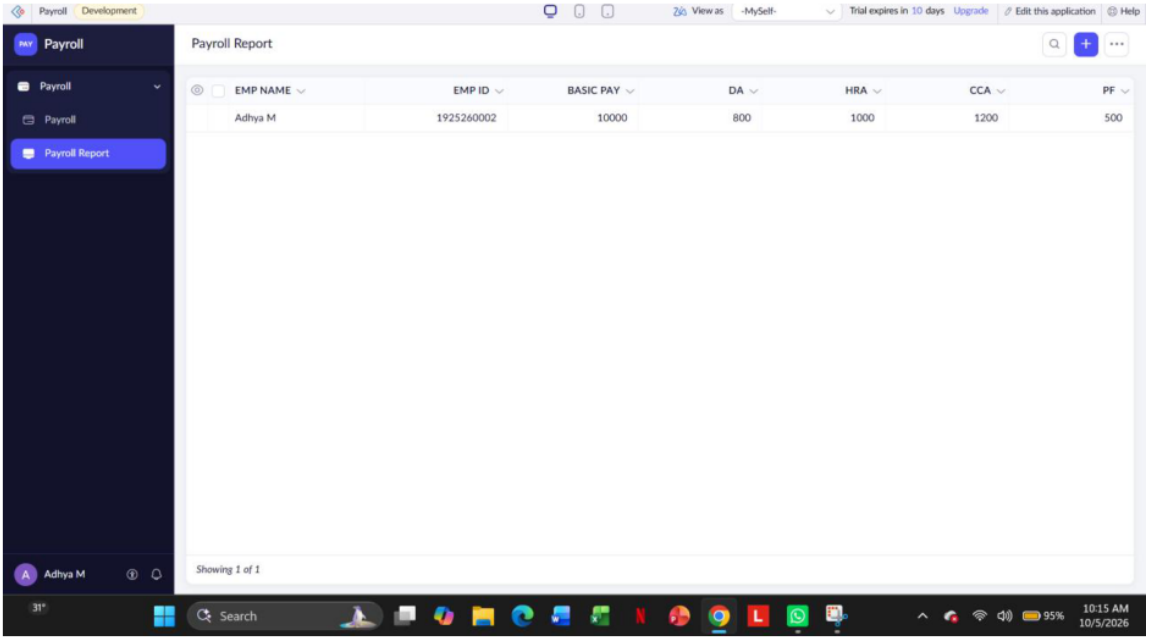

The payroll form is used to enter employee salary details. The Payroll Report displays the submitted record.

Implementation

Input:

Output:

Result

Thus, the Payroll Management System was implemented using Zoho Creator. Employee payroll details were entered through the form and the submitted record was verified in the Payroll Report.
